A Science-Based Ecosocialist Strategy for Climate Security

Journal of World Systems Research

p.113 “This is still possible if a robust solar transition starts very soon coupled with rapid termination of fossil fuels with using **less than 4 percent** of proven reserves, limiting warming to no more than 1.5°C (Schwartzman and Schwartzman 2021).” **[bold added]**

Corrected: “**less than 28 percent**” (see footnote).

p.133 Corrected:

Schwartzman, David. 2019a. “What a Green New Deal for DC could mean for the city’s working- class residents,” *Green Party US*, (https://www.gp.org/green_new_deal_for_working_class_residents).
